

URBAN DESIGN LINE  
**ROUND MODEL**  
**D250MM**  
SUPPLY BOLLARDS

FOR DISTRIBUTION  
OF ENERGY AND SERVICES

## THE ROUND SUPPLY UNITS

made by New VMR S.r.l. are designed in order to deliver a sober and elegant product, suitable to be installed even in historic and city centres; infact, the functional design given to the bollards allows to Socketrve the architectural style of the sorrounding environment.

According to the top's finish, it's possible to choose between five different models:

### CUT

the bollard without any top and with a flat surface

### BOMBER

the bollard with a slightly round surface, like a button finish

### IRIDE

the bollard with a sloping top finish

### MAGNUM

the bollard with a domed top finish

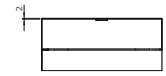

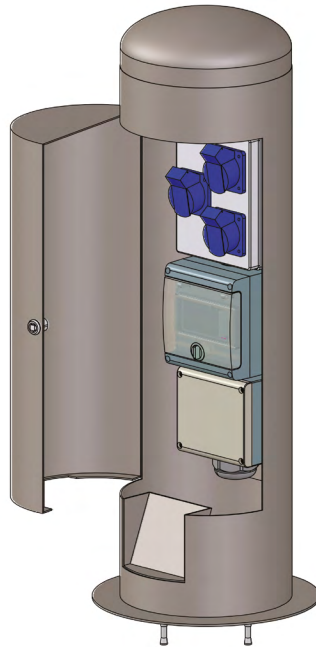

### PARK PARIS

the bollard with an elegant design finish and flat surface

Each round unit, made of AISI304 or AISI316L stainless steel, comes with a door and cable outlet in order to use it when closed and may come with three different diameters, that can be combined with different heights. The dimensions of these units is determined according to the equipment that has to be fitted inside.

### MECHANICAL SPECS

Urban Technology by New VMR S.r.l. round supply unit of the Urban Design line for the distribution of energy power and services, model according to its top finish :

- CUT** without top and with flat surface
- BOMBER** with a slightly round surface, like a button finish
- IRIDE** with sloping top finish
- MAGNUM** with domed top finish
- PARK PARIS** with an elegant design finish and flat surface

entirely made of AISI304 stainless steel (AISI316L on demand and if installed in sea areas).

Completed with its door and cable outlet to use the unit even when closed. Internal fastening system and IK10 impact resistance. Painted standard colour micaceous iron grey or special RAL colour with gloss or mat finish on demand and extra charge.

Dimensions: diameter **250mm** with the height suggested by New VMR staff or the one related to a specific equipment **H860** o **H1200mm**.

### ELECTRICAL SPECS

230V/400V tension e frequency between 50/60hz, according to regulation EN 60947-1 and EN 61439. Socket protection is standard grade IP44 (IP67 protection grade for the sockets only on demand; IP67 protection grade may need to change the dimensions of the unit). Electrical equipment containment box with IP 66 protection IEC 60 529 and CE70-1 double insulation in thermoplastic material free of halogen self-extinguishing halogen, painted gray RAL 7035 resistant to abnormal heat and fire up to 650 ° (incandescent wire test according to IEC 60 695-2 -1). Elastomer sealing gaskets for dimensional stability in continuous operation from -20 ° to + 85 °. Resistance to chemical agents (water, saline solutions, acids, bases and oils) and atmospheric agents. Reference standards: CEI 23-48 and IEC 60 670. This system is suitable for manufacturing equipment and for places with a higher risk of fire (IEC 64-8 / 7).

## GENERAL TECHNICAL DETAILS

### STRUCTURE

Impact resistance IK10

Structure made of AISI304 stainless steel

Structure made of AISI316L stainless steel for waterfronts in sea areas

### CONNECTION SYSTEM

Direct connection to its terminal block

### ELECTRICAL SPECS

Voltage 230V/400V

Frequency from 50hz to 60hz

Standard protection IP44 (IP67 on demand)

Regulation EN 60947-1 and EN 61439

### ADDITIONAL EQUIPMENT

Wall Box for electric car and vehicle charging system

LED lighting diffusor system

Compressed air outlets

Audio / video connectors

RJ-data / video / telephone jacks

Water outlets / valves 1/2" or 3/4"

Energy consumption meters

Water consumption meters

Prepaid system with rechargeable BADGE cards

### OPTIONAL ACCESSORIES

Fixing template

Stainless steel well with integrated fixing template

LED lighting ring

EQUIPMENTS
